

Customer Experience Update

keep employees in the know

Practicing customer experience is, in and of itself, a change management procedure. It is a journey until the transformation becomes the method of doing business. Communication is essential for securing employee buy-in and adoption, as well as educating workers about the upcoming changes.

An online update keeps everyone informed and involved

For an effective customer experience implementation, a compelling internal communication strategy is required. Employees begin to ignore change when they do not see it or hear about the progress that is being made; they definitely do not want to be a part of it.

CX update, our e-program to help companies with internal communication. It reminds employees of what client experience is and why it is happening. It describes the patterns using up-to-date cases and examples. It educates employees and reinforces fundamental customer experience knowledge.

CX Update tells employee and customer tales and discusses progress updates, wins, and successes with clients. Sharing critical information such as research and monitoring results, as well as customer feedback. Keep the information pertinent, consistent, and motivating, and connect it as much as possible to the Experience Archetypes®.

Communicate about CX transformation initiatives on a regular basis. Keep employees informed and involved, and you'll see acceptance and buy-in to the journey stronger than you could have anticipated.

CX Updates secures employee buy-in and adoption
